DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claim 1-6, drawn to a capacitor device, classified in class 361, subclass 825.
- II. Claim 7-8, drawn to method of fabricating a capacitor device, classified in class 29, subclass 592.1.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the heat shrinking resin tube can be heated directly by using heating lasers and thus shrinking and adhering to the capacitor.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

Examiner Note

With respect to claim 8, examiner believes the dependency should be to claim 7 and not to claim 6 as is written. If this is correct please change the dependency of claim 8.
